SYQ GROUP PROFILE

BUSINESS SOLUTIONS حلول الأعمال

About us :

SYQ GROUP is a group of companies specializing in providing integrated and comprehensive solutions in several vital sectors, aiming to support businesses and projects from idea to full operation.

We are distinguished by our diverse expertise, combining technical and managerial knowledge to deliver added value that ensures the success and sustainability of our clients in both the public and private sectors.

Our vision :

To be the leading partner in the region for developing, implementing and managing projects across various economic sectors.

Our message:

Providing smart, effective, and high-quality solutions that contribute to building a successful business environment and strong, sustainable institutions.

Our values

Innovation in solutions

Quality in execution

Transparency and credibility

Customer satisfaction

Our business sectors:

Consulting sector

We offer comprehensive consulting services aimed at developing organizations and enhancing their growth and competitiveness.

Our work is based on scientific methodologies and practical experience, ensuring accurate analysis and effective solutions.

Industrial sector

We work to provide integrated industrial solutions that meet the needs of various sectors and keep pace with industrial development in the region. We aim to build an integrated production system that ensures quality, efficiency, and sustainability in every project.

Service sector

We offer integrated operational solutions that ensure business continuity and operational sustainability. The sector focuses on providing innovative support services that enhance performance and facilitate the management of various projects.

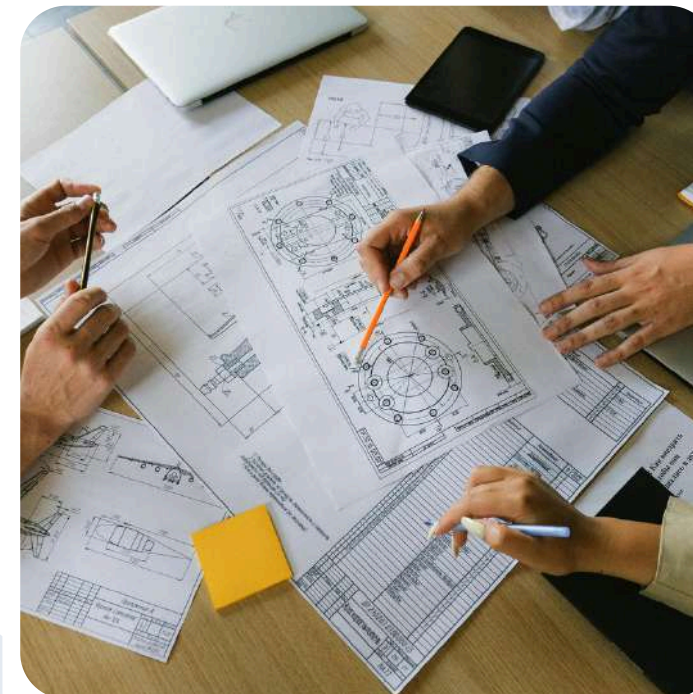

Commercial sector

In this sector, we aim to provide innovative solutions that ensure products and services reach target markets efficiently, while maintaining the highest levels of quality and reliability.

Consulting sector

Our consulting services include:

1. Economic and financial studies to assess markets, conduct feasibility analyses, and estimate risks and returns.
2. Management and organizational development consulting to improve organizational performance and enhance operational efficiency.
3. Preparation of feasibility studies and business plans for new or expansion projects, providing a clear financial and strategic vision.
4. Performance improvement and strategic planning through the development of long-term plans and key performance indicators (KPIs).
5. Advanced industrial and technical consulting to support manufacturing processes, quality, and industrial digital transformation.
